

Adil Mubarak

Backend Engineer | Go (Golang)

+91 7012814660 · aadilmubarake@gmail.com · github.com/adil-mubarak · linkedin.com/in/adil-mubarak · Kerala, India

SUMMARY

Backend Engineer specializing in Go with professional experience building REST APIs and database-backed services for SaaS products. Works with MySQL, Redis, Docker, authentication, reporting logic, payments, external API integrations, migrations, and SQL optimization.

EXPERIENCE

Texol · Backend Developer

Feb 2025 - Present

- Develop and maintain Go REST APIs using layered repository/service architecture for Vanforce and TSEEP.
- Implement product intelligence, dashboards, KPIs, filtering, sorting, pagination, comparison, drill-down, and inventory snapshot logic.
- Build target planning APIs with monthly, quarterly, and yearly rules, overlap validation, parent-child limits, and transactional operations.
- Work with MySQL datasets through reusable repository queries, migrations, and SQL optimization for reports and analytical dashboards.
- Implement assessment reports, PDF/certificate generation, Excel/CSV/ZIP exports, multi-tenant workflows, payment webhooks, and external integrations.
- Improve reliability with validation, structured errors, timeouts, retries, JWT authentication, OTP expiry, token blacklisting, and Redis caching.

SELECTED PROJECTS

Vanforce

Sales Force Automation & Distribution Management

Backend modules covering field sales, routes, customers, orders, inventory, collections, reporting, analytics, and business intelligence.

TSEEP

Educational Assessment & Intelligence Platform

User, institution, assessment, question, answer, scoring, reporting, payment, certificate, and recommendation modules.

SKILLS

Languages: Go (Golang), SQL · **Backend:** REST APIs, HTTP, Chi, validation, structured errors, testing · **Data:** MySQL, Redis, database design, SQL optimization, Goose migrations · **Security:** JWT, bcrypt, OTP expiry, token blacklisting, payment webhooks, HTTP/JSON APIs · **Tools:** Docker, Docker Compose, Git, GitLab, GitHub, Linux, Swagger/OpenAPI
